Product Summary

The Universal Therapy System is an alternating air replacement system designed to prevent and treat pressure ulcers. The UTS works on the principle of actively encouraging tissue blood flow by gently increasing and decreasing pressure within the support surface over a 10 minute cycle. This results in the reduction of surface pressures helping to prevent tissue breakdown and encourage healing.

Fully automatic with integrated pump.

Product Description

The Universal Therapy System is an alternating air replacement system designed to prevent and treat pressure ulcers. The UTS works on the principle of actively encouraging tissue blood flow by gently increasing and decreasing pressure within the support surface over a 10 minute cycle. This results in the reduction of surface pressures helping to prevent tissue breakdown and encourage healing.

Fully automatic with integrated pump.

If you supply TiMotionactuator control boxes for operation the bed you can plug it in to the actuator control box to operate both the bed and the mattress.

Product Attributes

- Adjustable pressure (comfort control): Yes
- Alternating cells: A+B
- Alternating / static mode: Yes
- Approval rating: UL, CSA and CE
- Air output litres per minute: 8
- Cell and foam combination: Yes
- Cell depth in cm: 15
- Cell material: Nylon/TPU
- Control panel lock: Yes
- Cover fixing method: Zipper
- Cover material: PU
- CPR deflation: Yes
- Low pressure alarm: Yes
- Mattress base material: Weave with coating
- Mattress depth in cm: 16

- Mattress length in cm: 200
- Mattress width in cm: 90
- Noise level (dB): <30 Very low
- Number of cells: 21
- Nursing / Auto firm inflation mode: Yes
- Power failure alarm: Yes
- Power in Volt and Hertz: 240 Volt 50-60 Hertz
- Pressure care level NPUAP Ulcer Stages/Categories: 4 Very High
- Standard cycle time in minutes: 10
- Visual 'Power-On' indicator: Yes
